**Third Coast Capital Advisors Represents  
Webster Manufacturing & Engineering in its Sale to  
Selas Heat Technology Company**

**Third Coast Capital Advisors** recently represented Webster Manufacturing & Engineering Co. in its sale to Selas Heat Technology Company of Streetsboro, Ohio. Third Coast represented the parent company of Webster who decided to divest the company in order to focus on their core business operations. This transaction is a good example of our experience and expertise in managing the corporate divestiture process.

**Webster Manufacturing & Engineering** is a leading manufacturer of multi-fuel boiler burners which serve as the heat source for the transformation of water to potable hot water, hot water for heating, and steam for heating and process applications. These burners are used in commercial and institutional markets including schools, hospitals and office buildings and for industrial applications including food processing, plating facilities, gas treatment plants and large manufacturing facilities.

**Selas Heat Technology Company** is a leading manufacturer of industrial burners, combustion systems and safety equipment used to enhance thermal processing applications. Selas products are designed to meet the heat processing needs of various industries including glass, steel, non-ferrous metals, chemical, automotive and plastic.
